

URINARY CARE

URINARY NUTRITION THAT'S A STEP AHEAD FOR THEIR BEST LIFE

- 1 Formulated to help dissolve struvite stones
- 2 Reduce the risk of calcium oxalate and struvite stones
- 3 Helps break the cycle of inflammation

SPOT THE SIGNS OF YOUR DOG'S URINARY ISSUES

SIGNS

- Urinating in the house
- Painful urination
- Urinating blood
- Repeated requests to go outside

RISKS

- Certain food
- Stones or crystals in the bladder
- Inflammation
- Infections

WHAT IS URINARY TRACT DISEASE?

URINARY TRACT INFECTIONS (UTIs)

Bacteria can cause inflammation, painful urination and bladder stones

STRUVITE STONES
Infection-induced (common) or non-infection-induced (rare) bladder stones lead to irritation and pain

CALCIUM OXALATE STONES

Increased urine saturation levels increase the risk of calcium oxalate stone formation
