BREAKTHROUGHS IN URINARY CARE

A STEP AHEAD FOR THEIR BEST LIFE

UNDERSTANDING FLUTD / LUTD

Feline Lower Urinary Tract Disease (FLUTD) in cats and Lower Urinary Tract Disease (LUTD) in dogs are general terms for various inflammatory diseases, infections, and other conditions affecting the urinary tract. Sometimes FLUTD and LUTD are caused by bladder stones. Struvite and calcium oxalate are common types. In cats, Feline Idiopathic Cystitis (FIC) is the most common type of FLUTD.

Certain factors can play a role

- Excess weight
- Stress in cats
- Breed
- Certain food
- Low water intake

SPOT THE SIGNS OF YOUR PET'S URINARY ISSUES

Peeing in the house

Painful urination

Blood in urine

Frequent urination

MANAGING YOUR PET'S URINARY ISSUES

When it comes to urinary conditions, there is no one-size-fits-all solution. That's why it's important to work closely with your veterinarian to determine the best course of action for your pet's unique needs.

HOW THE RIGHT FOOD CAN HELP

The benefits of Prescription Diet Urinary Care foods

Controlled levels of magnesium, calcium and phosphorus to reduce the building blocks of crystals and stones.

Promotes optimal urinary pH to help dissolve bladder stones and prevent recurrence.

High levels of omega-3 fatty acids to help break the cycle of inflammation.

Support for concurrent conditions associated with urinary issues, such as obesity and stress.

Prescription Diet Urinary Care foods help transform the lives of pets with urinary tract conditions through proper nutrition to help prevent or dissolve bladder stones, address weight issues, and more.
