

DOES YOUR PET'S STOOL PASS THE TEST?

Your pet's stool can be an important indicator of digestive well-being. The chart below helps determine the right steps towards your pet's ultimate digestive health. Ask your vet how nutrition can help promote healthy stools quickly.

STOOL GRADING CHART

1	Very loose, watery stool	
2	Pudding-like consistency, stool lacks cylindrical shape	
3	Very soft stool with some formed cylindrical shape	
4	Formed stool with cylindrical shape – some segmentation visible	
5	Formed stool with cylindrical shape and segmentation, easy to pick up	
6	Hard stool, spherical or cylindrical in shape	

Stool in the 3-5 range is considered acceptable. Your vet will determine the ideal target for your pet.

Hill's Prescription Diet GI Biome supports pets' unique gut microbiome. It demonstrated clinical results in cats with constipation or diarrhoea¹ and dogs with diarrhoea² **in as little as 24 hours.**
